

Club Scientific

Our camps specialize in hands-on, minds-on activities for children **ages 4-13**.

Club Scientific's camps will be offered at St. James United Methodist Church the weeks of June 8th and July 27th. Camp hours are from 9-4. Pre-camp and Post-Camp hours are available.

Cost: \$235 per week.

Imagine a day camp that is designed to offer children a choice of many different science themes. Themes which include experiments and projects in Video Game Creation, Robotics, Veterinary Medicine, Crime Scene Investigation, Culinary Science, Paleontology, Engineering, Space, Biology, Chemistry, Oceanography, and much more.

Now imagine that the day camp really exists and for 12 years has been providing an opportunity for young people to see how science works in the real world.

At Club Scientific, we believe that every child is a scientist. Our vision is to make them better scientists by offering 17 unique science day camps. Our camps inspire interest in science and nature by involving children in the creation of a multitude of take-away projects in each camp.

Our goal is for kids to have fun and get excited about science. Club Scientific's summer day camps rely on the expertise of visiting professionals. For example, campers will meet and learn from actual veterinarians, crime scene investigators, and local law enforcement officials in Camps CSI and Emergency Vet.

The camp day is divided into four major time slots which includes two extended sessions of science projects and experiments. The third session is an outdoor component which involves skill building and teamwork. The fourth major component is comprised of alternating science, craft, skill building, and outdoor recreational activities. Club Scientific tries to strike a balance between academic, social, and recreational pursuits.
